

The Story Behind the Saws and This Event

The Festool plunge-cut saws are rail-guided and are intended for use both in cabinet shops and on job sites. With functionality far greater than the typical circular saw, the Festool saws rival and in some cases exceed the capabilities of table saws.

Designed with safety in mind, the saws are equipped with anti-kickback riving knives. Dust control is designed into the saw to capture nearly all sawdust to the attached vacuum.

To maximize quality of cut, the saw has splinter guards on both sides of the blade. The variable speed motor assures the best cut available for the material you are working on.

Sheet goods such as plywood are easily cut using the rails and the parallel guides with extensions. You no longer need to wrestle these to a table saw for accurate cutting.

All of this and more will be demonstrated at the meeting.

Be sure to watch the YouTube videos listed in this brochure before coming.

Vacuums

The Festool CT vacuums complete the sawing system. The saws are designed to maximize dust collection, permitting use in finished areas.

Training -- Rockler

Rockler is providing this training as a value-added service to current and future Festool customers.

One of these videos was **Cabinetmaker and FDM Magazine** 2010 training video of the year. Another has over 94,000 hits.

Festool Saws and Accessories To Be Discussed and Demonstrated

TS 55 REQ and TS 75 Tracksaws

Guide Rails, Parallel Guides and Parallel Guide Extensions

Future Event: Visit to Festool North American Headquarters, Warehouse and Training Facility, Lebanon, IN. Tentative date is May 11, 2013.

About the Indianapolis Rockler Festool Interest Group

Group's purpose is education and information sharing. Rockler views this activity as a marketing service to current and future customers. The sessions will not be intensive sales presentations.

Roger Muller, Rockler associate, is serving as facilitator. Over time, other Rockler personnel and IRFIG participants will be instructors/speakers. Participants are encouraged (expected!) to present.

Meetings are conducted 4 times per year with no meetings during the summer. Targeted months are September, November, February and April. Meetings are held on Saturdays from 9 to 11 am at the Rockler Store in Indianapolis. You do not need to have purchased Festool equipment from Rockler to attend. If you have purchased elsewhere — you are still welcome!

You do not need to be a current owner of Festool equipment. Festool owners are the best sales people for Festool products. Come and learn what it is all about.
